Re: Application for Applied AI Engineer (m/f/d)

I am excited to apply for the Applied AI Engineer position at Shopware, where I can leverage my passion for AI and full-stack development to drive innovation in ecommerce. With a strong background in designing and building modern, AI-powered product experiences, I am confident that I can make a significant impact at Shopware. My experience in exploring novel architectures and physics-informed hybrid loss functions to improve model accuracy and stability aligns with the company's focus on pushing the edge of what is possible with the latest in AI.

Throughout my career, I have developed a strong expertise in building and operating production-grade AI/agent systems, with a focus on performance, usability, and maintainable architecture. My experience in full-stack development, including frontend interfaces using Vue.js, Next.js, JavaScript, and TypeScript, and backend services using Python, PHP, and Golang, enables me to work across the entire technology stack. I have also worked on multiple AI-related projects, including the development of a real-time tennis foul detection system using TensorRT, and the improvement of vitiligo segmentation accuracy to 94% using AI algorithms. My experience in collaborating with cross-functional teams, including product, design, and AI teams, has taught me the importance of effective communication and collaboration in driving successful outcomes.

I am excited about the opportunity to join the Agentic Commerce Lab at Shopware and contribute to the development of new products and experiences that shape the future of commerce. With my strong technical expertise, collaborative spirit, and product mindset, I am confident that I can make a significant impact at Shopware. I look forward to discussing my application and how I can contribute to the company's mission to enable companies worldwide to scale quickly and efficiently in digital commerce. Thank you for considering my application. I am eager to take the next step and explore how I can contribute to the success of Shopware.

Sincerely,

Muhammad Haider Zaidi
