☎ +49 1523 1698988 ✉ mhaiderzaidi21@gmail.com in linkedin.com/in/muhammad-haider-zaidi
🌐 github.com/chefhaider 🏠 Bavaria, Germany 🎂 21.06.2000

Technical Skills

Programming: Python, C++, SQL, Javascript

Data Processing: Earth Observation, Satellite Data, Linux, Python, Java, C++

Cloud and Distributed Systems: Cloud, Kubernetes, Docker, CI/CD

Data Engineering: PySpark, Airflow, ETL Pipelines, Data Ingestion, Data Cleaning

System Engineering: System Engineering Lifecycle, System Monitoring, Troubleshooting, Performance Analysis

Experience

German National Metrology Institute (PTB)

March 2024 – Present

Student Assistant Researcher

Berlin, DE

- Designed and developed data processing pipelines for Earth Observation data, utilizing Python and Linux environments
- Collaborated with researchers to integrate data processing services within operational ground segment environments
- Contributed to the development of system engineering lifecycle processes, including system monitoring and troubleshooting

Folio3

March 2022 – Nov 2023

Machine Learning Engineer

California, US (remote)

- Developed and deployed machine learning models for real-time data processing, utilizing Docker and Kubernetes
- Improved model performance and training efficiency, utilizing techniques such as data augmentation and transfer learning
- Collaborated with cross-functional teams to integrate machine learning models with data processing pipelines

Manda GmbH

March 2024 - June 2024

Werkstudent Python Developer

Nürnberg, DE

- Developed and deployed data processing applications, utilizing Python and Linux environments
- Contributed to the development of system engineering lifecycle processes, including system monitoring and troubleshooting

Freelance

July 2020 – March 2022

Data Engineer

Remote

- Designed and developed data processing pipelines for various clients, utilizing PySpark, Airflow, and ETL Pipelines

Projects

CAFA 6: Protein Function Prediction 2022

Deep Learning Competition

- Developed and deployed a deep learning model for protein function prediction, utilizing Python and Linux environments

Razanlytics: Real-time Bitcoin Price Forecasting 2022

Thesis Project

- Developed and deployed a real-time data processing pipeline for Bitcoin price forecasting, utilizing Python and Linux environments

Saaz: AI Self-Playing Chitralli Sitar 2023

Signal Processing, Music Generation

- Designed and developed a real-time signal processing system for music generation, utilizing Python and Linux environments
- Collaborated with researchers to integrate signal processing and music generation techniques

Hugging Face Open-Source

Contributor

- Contributed to the development of open-source data processing and machine learning libraries, including Hugging Face Transformers

Education

Friedrich Alexander Universität Present

Master of Science in Artificial Intelligence

Erlangen, DE

- Specialized in deep learning for computer vision and spatio-temporal modeling, with a focus on Earth Observation data
- Relevant coursework: Advanced Neural Networks, Computer Vision, Autonomous Systems, and System Engineering Lifecycle

National University of Computer and Emerging Sciences Aug 2018 – June 2022

Bachelor of Science in Computer Science

Karachi, PK

- Dean's List of Honor
- Specialized in Machine Learning and Computer Vision with focus on time-series analysis, and data processing

Certifications

PyTorch: Deep Neural Networks with PyTorch | **Coursera:** TensorFlow Developer Certificate
| **Databricks:** Lakehouse Fundamentals | **Datacamp:** Computer Vision in Python
