Re: Application for Machine Learning Engineer (m/f/d)

I am writing to express my enthusiastic interest in the Machine Learning Engineer (m/f/d) position at PAYBACK, as advertised. As a pioneer in the data economy and a leader in loyalty programs, PAYBACK's commitment to developing all its technical solutions in-house, especially its productive ML platform on GCP, deeply resonates with my passion for building robust and scalable AI systems. I am particularly drawn to the opportunity to contribute to a platform that supports the entire lifecycle of ML models, ensuring every action becomes a rewarding experience for users.

My background encompasses significant experience in MLOps, Python development, and deploying scalable AI solutions, aligning directly with your requirements. At Folio3, I managed robust MLOps pipelines on AWS SageMaker, including addressing YOLO model data drift and maintaining Kubernetes infrastructure, showcasing my ability to ensure stable and secure operation of AI systems. I significantly improved vitiligo segmentation accuracy to 94% and increased speed by 5x using AI algorithms, deploying solutions efficiently with Docker and FastAPI. Furthermore, I developed a real-time tennis foul detection system with TensorRT, reducing compute cost and time by 6x, demonstrating my focus on performance and efficiency. I also have hands-on experience in the development of production-ready Python applications, designing and evaluating deep learning models for metrological applications at PTB, and building AI-based services and chatbots using the OpenAI API at Manda GmbH. While my MLOps experience has been primarily on AWS, I am eager to leverage my deep understanding of cloud-agnostic MLOps principles, CI/CD, and scalable Python development to master and contribute effectively to your GCP-based platform.

I am confident that my strong analytical skills, structured approach to problem-solving, and proven ability to operationalize data and AI products make me an excellent fit for this role. I am particularly excited about the prospect of collaborating with PAYBACK's interdisciplinary teams to drive the development of your cutting-edge ML platform. Thank you for considering my application. I look forward to the opportunity to discuss how my expertise can contribute to PAYBACK's continued success.

Sincerely,

Muhammad Haider Zaidi
